Seamlessly link your facilities with a secure Metropolitan Area Network (MAN). Exchange data between remote sites at speeds up to gigabits per second and command your traffic while Comcast Commercial Services manages the connectivity.

Support your varying application needs with real-time traffic prioritization. Deploy performance sensitive, mission critical applications with confidence. Get true any-to-any connectivity and integrate new sites without reconfiguration or additional capital.

Enterprise NETWORK Service creates a reliable meshed network while offering multiple classes of service for varying applications. Choose **Basic Bandwidth** for email and file sharing, **Priority Bandwidth** for critical enterprise applications like CRM and ERP and **Premium Bandwidth** for real time applications like VoIP and video streaming. Comcast can help you determine the exact mix of bandwidth classes and capacity based on your current and future requirements.

Service Features

- Any-to-Any Connectivity – Send traffic to any site within your network through a single Ethernet interface.
- Secure – Reliable data segregation provided by masking your traffic with a unique customer ID on the Comcast network.
- Class of Service Aware – Dynamic traffic delivery with up to three different performance levels.
- VLAN Transparency – Change your VLAN configurations without coordinating with Comcast.
- Web-based Reporting – Monitor connectivity and performance through our secure web portal.

Business Benefits

- Enhanced User Experience – Improve response times of bandwidth-intensive applications and enable new applications like ERP or VoIP.
- Ease of Use – Connect your Local Area Networks (LAN) without any wide area network (WAN) equipment to purchase.
- High Availability – Minimize interruptions and keep your business running smoothly. We monitor and support your network 24x7 and have over 99.97% network availability.
- Optimized ROI – Reduce operating and maintenance costs with less equipment to support.
- Minimized Risk – Deliver networking capabilities to your internal customers on-time and on-budget.

The benefits of a fully meshed regional architecture are simple to calculate and with Comcast Commercial Services it's cost-efficient and easy to integrate and manage complex network architectures.

Comcast Enterprise Network Service is a Cisco Powered Network service. Comcast Enterprise Network Service achieved this designation by maintaining high levels of network quality and by basing our service end-to-end on Cisco equipment—the same equipment that virtually all Internet traffic travels on today.

Telecommunications

Increasing Margins with Lower Transport Costs

Carriers are expanding their networks to complete coverage, increase QoS and grow market share. As a result they face rapidly increasing transport costs. Whether it is local loop charges or backhaul transport, carriers need to quickly address operational expenses to drive fiscal performance.

Carrier face other issues, like having limited configuration options and spotty coverage in residential and rural areas. While most networking companies can deliver in certain areas, very few have a wide footprint. Those that do have broader coverage, usually have rigid pricing structures and inflexible service configurations. Worst of all, you are often buying from a competitor or their parent company

Comcast's services can be deployed quickly and efficiently with minimal wait and bureaucracy than you are typically confronted with when purchasing services from traditional telephone carriers. Comcast We offers carriers a range of services that can support your voice and data transport needs with much lower costs. From traditional TDM, ATM and SONET, to Ethernet and managed wavelength configurations, Comcast has a solution to meet virtually any requirement.

Our pricing structures aren't impacted by LATA boundaries or local loop charges allowing us to offer more flexible terms. We can provision a tailored network that can rapidly scale so you don't need to over-engineer for future demand.

Comcast Commercial Services leverages the massive network of our

parent company. This allows you to have managed access on a carrier class transport network designed for broadband applications. Our reach is broad and deep, with capacity in dense urban, sprawling suburban and even many rural areas others can't reach. More importantly, Comcast's Network is not part of the traditional telecommunications infrastructure, allowing Comcast to offer a physically diverse routing.

Comcast Advantage

Lower-cost data and voice transport on a single company's fiber network with broad reach and technical and economic flexibility.

Carrier Benefit

Cost-effective transport that can reach into new markets and scale at a moments notice. A stable and reliable service from a trusted network provider.

Contact us today to find out how your transport needs and our capabilities can be meshed for the technical and financial benefit of your organization.

The "Triple Play" of Cable TV, Data and Internet services delivered in bulk to your company infrastructure is an RCN specialty.

You may be a University, a Hotel, a Hospital or a company in a campus environment. Bulk cable service and cable modem services can provide your students, guests, patients, and staff with the tools to acquire, process and communicate information throughout and beyond your organization.

10 Mbps Internet connections move a light speed onto the RCN fiber optic network to ensure that your communication transmission and receipt is done securely and with integrity.

RCN Business Solutions broadband services include fulfilling customer needs for large scale deployment of cable and cable modem services.

RCN Business Solutions video service can be customized to meet the unique needs a client may have. CNN is the early warning system in most service industries.

RCN Business Solutions is able to construct custom broadband infrastructure that uniquely meets your requirements. You may be a developer helping to create housing, businesses and commerce. We are your partner who will ensure that you deliver a "Smart" infrastructure ready to serve the needs of 21st Century users.

* We specialize in risk/reward contract terms.

Small Business

Let a Partnership with RCN Empower Your Business

- Reach More Customers
- Lower Your Costs
- Entertain and Inform Your Clientele
- Free Consultation and Installation

As an independent business operator you don't need more bills, what you need is a partner who'll help you develop more business. Whether you operate a bistro, health clinic, law firm or beauty salon, it makes no difference. RCN will serve as a partner by providing the services you need to efficiently operate and even grow your business.

Free Consultation

A partnership with RCN begins when one of our knowledgeable Small Business Representatives meets with you and your staff to evaluate your company's cable TV, phone, internet and advertising needs. This free consultation is designed to create a tailored communications package that will help your business succeed. This evaluation process is free and there is no obligation.

Reach More Customers

RCN offers services that help independent business operators like yourself address a fundamental question -- how do I attract more customers? With services like high speed Internet, website hosting, email and affordable cable TV advertising, RCN can help you put together a plan to expand your company's visibility.

Lower Your Costs

We understand that keeping costs low is critical for a small business, that's why RCN has put together service bundles designed to help you save money. By delivering cable TV, phone and internet service to the same customer over the same network, RCN realizes significant savings -- those savings are passed onto you. What's more, RCN offers choice and flexibility in its phone service, allowing you to choose the plan that's most efficient for your business.

Entertain and Inform Your Clientele

Your customers are your livelihood, so we understand that you want to treat them well. For many businesses this means informative voicemail messages or commercial-free music piped into your waiting room, lobby, or work area. For some businesses it means offering quality cable TV programming to enhance a dining experience. For others, it means business news and information made available 24 hours a day. Whoever you serve, we can help you put together a solution that helps keep your customers entertained, informed and

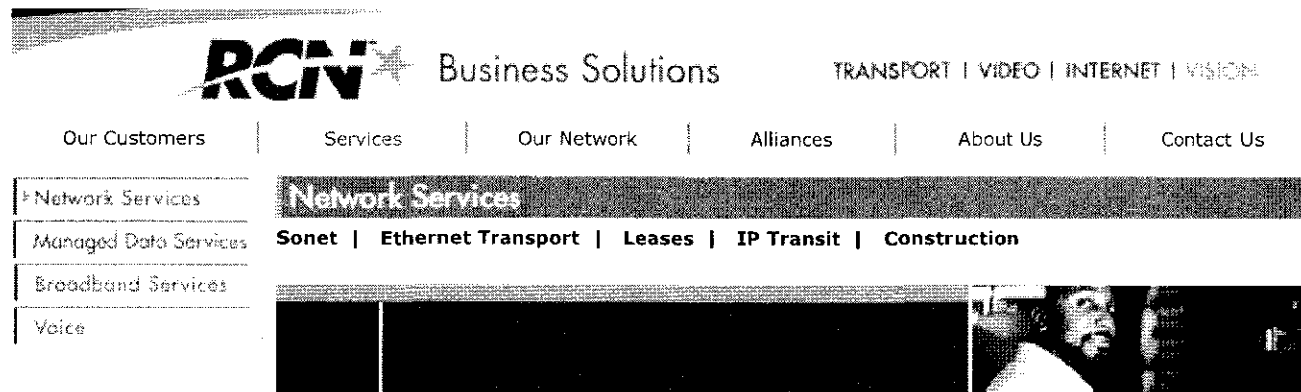

believing that your business offers a professional, helpful and inviting atmosphere.

Free Standard Installation

That's right. As a qualified customer who signs up for a bundle, RCN will make sure it doesn't cost you a dime for standard install cable TV, phone or internet service in your business location. When there's payroll to meet and suppliers to pay, who wants to think about the cost of switching to a better telecommunications provider. Now you don't have to. Getting started with RCN is free.

Note: All RCN Small Business Services are subject to the RCN Small Business Terms and Conditions. Please contact an RCN representative for more details.

[RCN Home](#) | [RCN Business Solutions](#) | [RCN Small Business](#)

The image shows the top portion of the RCN Business Solutions website. At the top, there is a navigation bar with links: "RCN Home", "RCN Business Solutions", and "RCN Small Business". Below this is a large banner with the "RCN" logo and the text "Business Solutions". To the right of the logo, the words "TRANSPORT | VIDEO | INTERNET | VISION" are displayed. Below the banner is a horizontal menu with links: "Our Customers", "Services", "Our Network", "Alliances", "About Us", and "Contact Us". On the left side, there is a vertical menu with links: "Network Services", "Managed Data Services", "Broadband Services", and "Voice". The "Network Services" link is highlighted, and a sub-menu is displayed below it with links: "Sonet", "Ethernet Transport", "Leases", "IP Transit", and "Construction". Below the sub-menu is a large image showing a person's face, possibly a customer or employee, in a dark setting.

RCN Business Solutions is a leading provider of communications services to carrier, enterprise and government marketplaces. RCN Business Solutions offers a comprehensive array of network services over our state-of-the-art fiber optic network. We will work to create a customized solution that fits your needs. With over a decade of experience, RCN Business Solutions has the experience needed to be your network service provider.

The RCN Network

- Presence in six of the top US markets
- Over 3,500 route miles of metro fiber
- Over 450 commercial buildings On-net
- National IP backbone
- Over 425,000 residential customers
- Class five switches in every market
- Video Headend in every market

Local Loop Transport

RCN is quickly becoming the preferred choice to connect you from your POP to your partner's POP or directly to the customer premise. Our strength is in providing a true alternative to the "usual suspects" for local loop. Because of our extensive local networks and excellent access to **carrier hotels**, we offer complete independence from the ILEC and we specialize in Business continuity solutions and applications that require construction.

Our metro area services include

- SONET from DS-3 through all OC-n rates.
- Ethernet from 10 Mbps through 10 Gbps
- Strategic Dark Fiber

Voice Services

As a facilities-based carrier of competitive residential services, RCN built a robust local network that we own and operate. Our voice network features a Class 5 Switch in each of our six markets. We offer the following services to our customers:

- Local Origination
- Local Termination
- Facilities Based Local Services

- Long Distance
- 800# Service
- Audio Conferencing

IP Transit

RCN Broadband, RCN Commercial, and RCN.com provide over 1 million customers direct Internet access. Our strong local network is complemented with a national IP backbone as well as an extensive list of peering partners.

National and International Private Line

Our customers continually request that RCN apply our strong implementation and operational capabilities towards a long haul product. To answer this need, RCN has partnerships with several top tier long haul providers to extend our capabilities for long haul capabilities. This allows RCN to provide total solutions across markets that include both the local loop and the long haul portions of the circuit. We reach most major markets and all of the top international destinations.

Why use your capital dollars to buy data management and storage infrastructure that RCN Business Solutions has built especially for your purpose.

In today's business climate, controlling capital expenses while keeping pace with an ever-increasing demand is paramount to success.

What if you had a partner who converted capital costs into expense?

What if there is a new and complex network infrastructure in place that moves data at light speed to accelerate your business efficiency?

What if service upgrades were performed automatically as part of your low monthly expense?

What if you found a partner to help carry the load while reducing costs?

RCN Business Solutions managed data services were created with these benefits in mind:

- Give our customers excellent Managed Data services while reducing the internal management responsibilities and costs for our customers.

RCN Business Solutions currently offers a wide assortment of managed services:

- Access to our state of the art network
- Top notch colocation facilities.
- Managed server programs.
- eMail security services.

RCN Business Solutions will build customized services to meet your needs.
